ASTEC

Challenge

- ▶ The client had concerns around their overall technology & infrastructure – there were issues with their security, gaps and pitfalls in their processes as well as general maintenance of their day-to-day applications and resources.

Journey

- ▶ Conducted a thorough audit of their entire technology and infrastructure, investigating processes and issues even at a micro level to maximise the information and data points before ideating and designing fixes and remedial solutions.

Outcome

- ▶ Provided a substantial auditing report highlighting any potential technology risk to the business areas
- ▶ Through effective analysis provided a roadmap of enhancements to ensure a better overall IT ecosystem
- ▶ Working in long-term partnership with the client on several projects continuously improving and enhancing their environment for better business efficiency
