

UK Specialist in

design and printing

Challenge

- ▷ Two office locations remotely connected but all data was hosted in a single location causing remote access difficulties for business users
- ▷ Productivity impacted due to speed concerns

Journey

- ▷ Designed a network architecture to meet business requirements
- ▷ Upgraded networking infrastructure to enhance security standards and increase network speed
- ▷ Enhanced bandwidth for business requirements by collaborating with a 3rd party service provider
- ▷ Improved VPN functionality for users and communication between office networks

Outcome

- ▷ Enhanced business productivity through improved and increased remote access and network connectivity
- ▷ Improved remote access capabilities so the business devices can operate from approved secured location
