

DESIGN
AND PRINTING
AGENCY

Challenge

- ▷ Outdated legacy systems that managed all their IT requirements, which became problematic.
- ▷ Systems were particularly slow, were not updated to comply with cyber security issues
- ▷ End of life technology stacks which required migrations
- ▷ IT systems were not GDPR compliant, and all company data was at risk.

Journey

- ▷ Our experts Astec worked with the client by aligning their requirements with a suggested technology product suite.
- ▷ A new Microsoft infrastructure for data and application access
- ▷ Architecture planned and designed for central management of their network

Outcome

- ▷ The result of our solution was that the client could work efficiently, and their IT network performed quickly, and was easier to use.
- ▷ Minimal training was needed for users to use the new network proficiently
- ▷ A secure and robust network
- ▷ Central management for control and auditing purposes
